COCOM Document No. 3670

COORDINATING COMMITTEE

RECORD OF DISCUSSION

CN

THE INTERPRETATION OF ATOMIC ENERGY LIST ITEMS

5 (DEUTERIUM) AND 8 (ZIRCONIUM)

7th September 1959

5/10

Present: Belgium(Luxembourg), France, Germany, Italy, Japan, Netherlands,
Turkey, United Kingdom, United States.

References: COCOM Documents 3632, 3656.

1. The CHAIRMAN drew the attention of the Committee to the questions which had been put by the German Delegation concerning the interpretation of Atomic Energy List Items 5 and 8 (COCOM 3632). The reply of the United States Delegation was to be found in their Memorandum COCOM 3656, which concluded that in the case of each item the ratio condition referred to each compound.

2. The COMMITTEE agreed that the ratio condition applied to the whole item in both cases.

3. The GERMAN Delegate expressed his thanks for the replies which had been given and which cleared any doubt on the interpretation of the two items concerned.
